Lab 1: Web Exercises
Orientation Cover Sheet

Name_________________________ Date ______________

Section _______________________

Objectives for this lab:
♦ To be able to log on and use a browser
♦ To be able to use google.com to make specific searches
♦ To be able to use another search engine to make the same searches
♦ To answer questions about search engines

Fill in your answers to the questions asked in the lab here.

1. Which browser are you using?

2. Describe the bar that appears on the top of the screen.

3. Was the "Search" button on the screen or did you have to search for it?

4. Are you asked to choose which search engine you wish to use or are you just presented with a window that asks you for the key words for which you wish to search? If you are given a choice, what are the choices?
5. List the number of references (hits) returned and the time of the search (on top line).

♦ Computer Science

♦ Computer Engineering

♦ Computer Science OR Computer Engineering

♦ (Computer Science) OR (Computer Engineering)

6. Discuss the differences in the number of hits in the four searchers above. Can you draw a conclusion for these results?

7. What other search engine did you use?

8. Were you able to get the same information? Explain.

9. Which search engine did you feel gave you the best information? Explain
